Designed to support your business and help you grow

Businesses are always looking for new ways to be more productive and make the most of technology. We're here to help you make the most of it. We are "at your side" all the way and will guide you in the process of choosing the right solution, support you if you have any queries and make sure that you get the best performance at the best price.

Building on our position as number one in Denmark on the mono laser market*, we've added to our portfolio for businesses with a range of high-performance inkjet printers, giving you more choice, more possibilities and more reasons to choose Brother.

With Brother you are guaranteed the close "at your side" service that we've built our business and reputation on. We've designed our latest business lineup to deliver all the performance, reliability and choice you could need.

*Q1 2019, DMR.no

Why choose Brother for business?

We've designed our complete lineup to give you more choices and more flexibility. We're committed to provide you with the best options in the market.

- We have produced business printers since 1971
- Superb long-term value and low cost of ownership with high-capacity toners in-box
- All products backed by our unrivalled "at your side" support
- Award-winning products that have been extensively trialled and recommended for their faultless reliability by leading independent testers BLI

What do SMEs want from their printer?*

Brother's extensive laser portfolio offers print solutions for all. With a flexible and scalable feature set developed specifically with SMEs in mind, you get the professional printers you need.

Reliability

- Can be left to print large quantities without paper jams
- Minimal maintenance and infrequent breakdowns
- Long-lasting consumables

Quality

- Clear images
- Quiet machines
- Award winning

Speed

- Quick-use LCD screens
- High speed across colour and mono
- High speed scanning

Designed for security

Security is a major concern for businesses and it's crucial that any print solution is designed with robust measures in place to keep you and your data safe. Our professional range does just that. You are protected at the network level using end-to-end encryption and port-based access control, designed to let you connect and share documents with confidence. Plus, our devices use anti-intrusion detection software to constantly monitor and protect against the threat of hacking.

There's the option of PIN and ID Card-protected printing to ensure printouts don't fall into the wrong hands, and Secure Function Lock to give you better control of your print environment by restricting certain capabilities to specific users.

Designed to boost productivity

Our business machines are designed with a simple idea in mind: help you spend less time dealing with print and more time focused on your business.

High-capacity automatic document feeders, expandable paper handling and the ability to include multiple media types in each tray should keep things running smoothly. While other clever features help you connect to smarter ways of working. Like the ability to scan direct to network folders and cloud services, making remote working a success.

- Print direct from smartphones and tablets
- Enable wireless direct printing to print from mobile devices and laptops without accessing the network
- Our BRAdmin software enables you to manage all the fleet from a central location to help reduce downtime and increase efficiency.

Taking sustainability seriously

We know you take your sustainability responsibilities seriously. As a supplier, we think it's important to help you minimise your impact on the environment. We are committed to sending zero waste to landfill, so we'll recycle your used ink and toner cartridges at no extra cost.

We're dedicated to 'designing out' waste from our product cycle to create a circular economy – recovering and regenerating products and materials at the end of each service life.

For the updated professional range, we've created a suite of practical, environmentally friendly features. Printers come complete with a special Eco Mode that reduces power consumption, and there is also a Toner Save mode and automatic 2-sided printing to eliminate unnecessary waste.

Designed to keep costs low

High yield inks and toners give you more for your money, lasting longer and performing better than non-genuine compatibles. In fact, independent testing has shown that our expertly engineered Genuine Supplies deliver 57% more output on average than non-genuine equivalents.*

The devices themselves come ready-made to save money with intelligently designed extras. Toner Saver mode can cut supplies costs by up to a third, automatic 2-sided printing eliminates waste, and options such as print quotas and restricted colour printing ensure you are always in control of their spend.

Eliminate paper waste further through embedded print management solutions such as:

Designed to improve workflow

The professional range features technology to improve workflow for any team, including scan to/print from USB and connect via Office and cloud applications for improved access in the office and on the move. Similarly, solutions such as Barcode Utility, document routing software, allow you to streamline your document management systems with barcode scanning. You can even design your own shortcuts on the fully customisable touchscreens to speed things up.

All of our machines are also designed to fit seamlessly into your existing document management system.

Designed around you

With our professional printer range, the customisation and flexibility doesn't stop with the machines. As part of our Managed Print Services approach, we build a deep understanding of each business and its specific print environment.

An MPS agreement will enable you to save money, get a good overview over costs and ensure that there will be no unforeseen expenses. Once the agreement is in place with a Brother reseller, the machines will be setup and the consumables will be delivered automatically.

Our outstanding laser portfolio

You might know that Brother is one of the leading brands for laser printers, but you might not know just how much our range of laser machines has grown. We've got something to suit the needs of every business, from compact single function printers to large-capacity, colour all-in-ones.

The sheer breadth of the range means you have a fantastic variety of products. We also offer our high-performance laser machines on our contractual Managed Print Service.

Whatever it is you are looking for, you can count on Brother to offer quality you can depend on.

Tailored to your needs

Designed to meet the needs of high-volume users, Brother's SME colour and mono laser ranges let you print with confidence, offering fast print and scan times and lower costs thanks to super and ultra high yield toners. Add to that enhanced security, intelligent mobile connectivity and expandable paper trays, and you have a printer that satisfies even the toughest demands in the office.

There are numerous customisation options, whether that's creating shortcuts for certain functions or using Brother Solutions Interface (BSI) to integrate your preferred software. The scalability of our range also offers accessory such as extra paper trays and mailboxes.

Designed to last

Brother's complete business lineup is designed to deliver dependable products. Constructed using robust materials and longer-lasting parts to ensure smooth operation, businesses can count on our machines, print after print, month after month, year after year.

Tested and trusted by Buyers Lab

Examined over two months and 80,000 pages, the machines tested by Buyers Lab measured up perfectly. No misfeeds. No service callouts required.

For even more peace of mind, we also offer extended warranty and on-site SWAP-service. In order to obtain this warranty, you are required to register the machine on our website within 60 days after date of purchase. In order to maintain the extended warranty and on-site SWAP-service the machine must be used as described in the manual and only with genuine supplies. Failure to do so will void the warranty and on-site SWAP-service.

Designed for reliability

The mono laser range designed for business

Our award-winning mono laser range is designed to give you the performance you need, in a package you can trust. Ideal for up to 10,000 pages a month and capable of super-high print speeds, these machines require minimal maintenance and are more than ready to keep up with the demands of life in business.
